

Plasticizer For Thermoplastic Elastomers & Plastics

Divyol Coloma 8/12/15/22/30/45/70/100 are bright and clear paraffin oils recommended to be used as dispersing agent and process aids for polymers.

Divyol Coloma 8/12/15/22/30/45/70/100 with colour less than 0.5 allows dispersion of colour and brightening agents like TiO2 in the polymer matrix. Due to its colour less nature it does not contribute to discolouration of the finished products.

Applications :

- 1. Colour master batches based on various polymers.
2. Filler master batches.
3. Thermoplastic Elastomers.
4. Coloured articles based on polyolefins.

Typical Specifications of Divyol Coloma Oils:

Table with 10 columns: Characteristics, Test Method, 8, 12, 15, 22, 30, 45, 70, 100. Rows include Appearance, Colour, Kinematic Viscosity, Flash Point, Pour Point, Aniline Point, and Volatile Loss.
